

## **A Self-made Congregation**

Close your eyes and think of a home  
That makes your life a bit better than you used to live  
Don't be afraid of the edge  
It won't cut like a knife if you just believe in creation

I'm the healer standing in the shadow of the doubt  
Floating with my wings like an angel  
Look down upon the crowd  
Waiting for the beam of light that will bring salvation  
The holy truth temptation  
Of a self-made congregation

It ain't no Wailing-wall to cry out loud  
Cause you're a failure always howling at the moon  
Just try and pay a call and see what's new  
It will be better you will notice very soon

A self-made congregation  
Without lamentation  
A self-made congregation  
The holy truth temptation

Raise your hands and watch yourself  
In a mirror and you won't believe  
That you are a donkey  
Call the name of the lord and believe  
All the lies about a worldwide sensation  
Without lamentation  
Of a self-made congregation

See all those happy faces  
Believing in eternal youth  
Found their ultimate basis  
Living in a holy booth  
Don't believe in oasis  
Take the rough with the smooth  
Snow may cover the traces  
But nothing can bury the truth
